 - Adaptability
 - Continuous learning
 - Critical Thinking

Experience

Product Designer at Shifl, (NY, United State)

February 2022 – Present | Part Time | Remote

In Shifl, I have been designing the industry's newest supply chain and logistics solutions. My everyday tasks at work involve identifying the areas in which technology can assist businesses improve the efficiency of their supply chains, and working with various teams to offer solutions to our users.

- Started learning/getting familiar with the existing figma design files, design standard, design system and style guides with and suggested areas that needs improvement with reason that justify my decision.
- Attending daily stand-ups and working with the team is an expected soft skill
- Brainstorming with design team via figjam tool, working along with developers for perfect implementation of UI/UX design and contributing to design component feature.
- Conducting Design Sprint and Design Critique Sessions, for usability testing with other research methodology tools, so as to meet up with users' needs.

Talent Product Designer at Andela,

January 2023 – Present | Contract | Remote

Andela's talent community is a rigorous technical leadership program that transform talented African individuals into world-class software developers and leaders.

I work on real-world projects for global clients, gaining valuable experience in building software solutions for real-world problems.

Sr. UI/UX Designer at Pioneering Programmers (Texas, United State)

January 2022 – February 2022 | Full Time | Remote

Pioneering Programmer as an outsourcing company, I learned and provided design solutions to Saas, B2B, B2C product in collaboration with team of developer, product manager, business analyst and gathering requirements from clients.

- I learned about the different clients and their existing products, checking through figma UI/UX Design files for each products and prepared design process guide to present to the stakeholder for better understanding of how to manage requirements and timeline.
- Attended daily stand-ups and working with the team is an expected soft skill
- Designed Style guides, Design system for new product, and working along with developers for perfect implementation of design decisions and detail interactions and flows.
- Conducted Usability Testing, A/B Testing with other research methodology tools, so as to meet up with requirements.

Front-End Developer & UX Designer Intern at Stetis Limited (Federal Capital, Nigeria)

July 2018 – February 2020 | Intent | Onsite, Hybrid

At Stetis, I was opportune to meet with team of professionals where I improved more on my front-end programming experience in related common languages and frameworks, and improving on user experience design with my design skills.

- I Collaborated with team members of different departments to gather requirements and evaluate user needs.
- I learned User Research, Evaluation and presentation of UX design decisions/thoughts for users' feedback with stakeholders, by adopting user centric Design techniques.
- Working closely with other development team to put design ideas into coding.
- Re-designed existing User Interface screens to better adapt to device responsiveness,
- Engineered prototypes to support research and usability testing.

Education

- 2021 – Bachelor of Computer Science, from Ahmadu Bello University, Zaria.
- 2021 – Google UX Design Professional Certificate.
- 2020 – Sololearn HTML, CSS & Javascript Certificate.

Hobbies

- Designing
- Traveling
- Researching (Watching Videos and Reading)
- Discussing Business Ideas
